MEMORANDUM FOR: NIO/Africa

FROM: Director of Central Intelligence

SUBJECT: Candidate for Two-week Active Duty
Tour w/Agency

While on my trip to Houston, I renewed acquaintance with a very bright young man who is in Naval Reserve Intelligence. He's done a lot of academic work on Africa, including a lot of travel there, and continues to work on Africa for Naval Intelligence, Ethiopia in particular. He has to do his two-weeks active duty sometime before long and asked me if I was interested in having him do it at the Agency rather than the Navy. I would like to do that if it can be worked out, both because I think he is a promising young fellow we'd like to have contact with and because it would probably be a more useful and interesting experience for him. I'm sure he has Top Secret clearances, but certainly not many, if any, codeword clearances. Could we put him to work for two weeks on some particular project about Africa without it becoming inordinately complex due to a lack of codeword clearances?
